

I have had the enjoyment of singing in the choir for 5 years, organizing forums for 3 years, making and organizing coffee for 3 years and serving on the shade sail committee.

In my last professional position, I served as Dean of Students at the University of Wisconsin-Superior, directing housing, health, counseling and other student services.

Raised and educated in the Lutheran faith, I became a Unitarian 20 years ago.

Interacting with International students, foreign travel, graduating from a traditional Black university have had a great impact on my life.

At BUU we are all considered to be in a vulnerable group because of our age and we have to strive to care for each other and make our community as joyful and loving as possible.

I plant trees as a hobby because I believe in the future.
